### Abstract

Higher education institutions must determine the most suitable environments and courses for e-learning delivery. Though Indians have been traditionally inclined towards conventional classroom based academic programs, the Government of India has been actively supporting the e-learning drive to overcome the various challenges and to strengthen accessibility. E-learning is a means of education that incorporates self-motivation, communication, efficiency, and technology. Improving the quality in teacher education e-learning plays an important role in the teaching- learning process. The educational institution's administration should compel teachers to receive proper training on learning software that enables them to educate and assist students effectively and efficiently.
