About the workshop

This Research Methodology Workshop is expected to provide the advanced theoretical and practical knowledge by exposure and use of different statistical package to research students of four stages - Master Degree students (preparing for writing brief dissertation work), planned to pursue the doctoral research programme, those who are at the stage of their data analysis and field work; and final stage of their thesis writing. It will cover the basics of research methodology focusing on theoretical and practical inputs. Specifically, the formulation of research problem, formulation of research hypothesis and testing of hypothesis, conducting literature review, data collection methods, selection of appropriate parametric or non-parametric statistical method for analyzing data, and report writing.

Objectives

- ✦ The inputs would be about developing a theoretical and methodological framework of their research, conceptualization and framing research questions, etc.
- ✦ To provide input to students who are in the planning stage of their doctoral research.
- ✦ To provide input to the student who are currently in the middle of fieldwork/data collection.
- ✦ To provide input to students who have finished field work and are in the process of writing.
- ✦ To create understanding and conduct research in social sciences.
